W. Alexander Williams, Ph.D.
Designation & Certification Manager
Off-Site Branch
Division of Eastern Area Programs
Office of Environmental Restoration
U.S. Department of Energy
Washington, DC 20585

Dear Alexander:

Thank you for sending me the enclosed February 19, 1991 letter from Mr. R. Sorum of Afrimet Indussa to Mr. Andrew Wallo, III, a former employee of a U.S. Department of Energy contractor. We are examining its contents relative to more recent statements by representatives of this corporation and will discuss this issue in the future with you.

I am particularly interested in the last sentence of the first page of this letter. I believe the facility referred to in Mt. Kisco, New York, was the former Canadian Radium and Uranium Corporation facility located at 69 Kisco Avenue, Mt. Kisco, New York. This site was decontaminated in late 1965. However, there is still residual contamination at this site.

Please provide me with any information you may have regarding this site and any determinations your agency made on inclusion of this site into the FUSRAP program.

Thank you for your assistance in this matter.

Sincerely yours,

Paul J. Merges, Ph.D.
Chief, Bureau of Radiation
Division of Hazardous Substances
Regulation
